## Scire Est Servire

The motto of this school, freely translated, means "knowledge implies responsibility." In other words the person who has the knowledge or ability to see through a problem also has a responsibility to do something about it.

But how should one go about doing something about a problem? All too often a persuasive demagogue can lead an unthinking mob into taking violent or illegal action. But Might does not constitute Right, even if it is used in an attempt to improve conditions. A so-called enlightened society should have well-educated citizens who are capable of dealing with problems through engaging first in research and dialogue and then in democratic procedures.

It is my opinion, therefore, that the one goal of our educational system should be to turn out graduates who are capable of seeing all sides of a problem and of being unselfish enough to support a solution which will be most beneficial to the majority. Only then will our educational system have produced a responsible citizen.

# President's Message

When we graduate this year, we will be leaving Herman Collegiate with a feeling of academic accomplishment, and in most cases, a feeling that the past five years have been the most enjoyable and rewarding of our lives. But now, whether we are going to further our education, or enter the world of employment, we must be ready to accept more responsibility than we have in previous years. Suddenly, there won't be teachers making sure that we complete our assignments and behave in class. Our success will depend entirely on our own ability to accept responsibilities, and we must acquire this ability, or risk failure.

I would like to thank everyone for their co-operation this year, and for helping to make this past year the most gratifying of my school career.

Woody McKaig

# Vice-President's Message

In the days of our youth, what we do in school, constitutes our present lives. It is true that the training we get here is carried over into the rest of our lives and forms habits, good or bad. Our job is school and we have to work at it. Our teachers may be our unconscious guides towards some objective we hope to reach.

Nevertheless, we ourselves need guidance to help realize our visions. School is one of the best places to get that guidance from considerate teachers who may believe in our dreams. They too have had the same ideas.

Our goal may change as the years go on, but having worked towards it will give us happiness and the satisfaction of accomplishment.

Winston Churchill once said: "There is not a week, nor a day, nor an hour to be lost."

How to say  
"Chrysler"  
in 2,790  
languages.

Believe it or not, that is how many languages  
there are in the world. And this symbol  
means Chrysler in all of them. It's a Pentastar,  
worldwide hallmark of Chrysler. It's found  
in over 130 countries throughout the  
world . . . wherever our products are  
manufactured, sold or serviced.  
Pentastar — mark of Chrysler quality.

# Another better idea from Ford.

Better ideas count only if you are first. The selectivity tower pictured at Ford of Canada's new St. Thomas passenger car assembly-plant is an example. It adds a new profile to the skyline of the Canadian automotive industry. Twelve storeys high, it stacks car bodies for immediate use when required on the final assembly line. It is a better idea—the kind that helps ensure better products.
